Full Stack Software Engineer with 3 years at Virtusa building enterprise systems using Java, Spring Boot, React, Python, and AWS. Built microservices, RAG pipelines, NLP systems, and React/Angular dashboards serving 8000+ users across distributed platforms. M.S. CS candidate at UWM (May 2026), AWS Developer Associate certified, delivered systems processing 1M+ transactions/day.

EDUCATION

University of Wisconsin–Milwaukee

May 2026

MS in Computer Science | Machine Learning, NLP, Data Mining, Cyber Security, Intelligent User Interfaces

Teaching Assistant — Evaluated Python, Django, JS, HTML/CSS assignments; conducted code reviews for 40+ students.

Sri Eshwar College of Engineering, Anna University

Apr 2022

Bachelor of Engineering in Computer Science

PROFESSIONAL EXPERIENCE

Associate Engineer (Software Engineer), Virtusa Corporation

Dec 2021 – Aug 2024

- Designed and deployed 10+ Spring Boot microservices processing 1M+ transactions and 200k+ API requests/day.
- Built secure REST APIs and GraphQL services with Spring Security, JWT, and RBAC for enterprise applications.
- Implemented event-driven architecture using Kafka across distributed microservices handling 50k+ messages/day.
- Developed React and Angular dashboards with D3.js visualizations used by 8000+ internal users for operational analytics.
- Integrated OpenAI APIs and built RAG pipelines using LangChain and vector search, cutting knowledge search time by 60%.
- Optimized MySQL, PostgreSQL, and Oracle PL/SQL queries via indexing and tuning, reducing query latency by 40%.
- Built CI/CD pipelines using Jenkins and GitHub
